

I believe I have the right more than telemarketers to not allow phone calls to my home. Its my privite place and i dont appreciate someone calling me and not listening to me when i say no.I was being bothered many times a day and now i appreciate the stop to the harassing phone calls.I pay for the phone and the line i should have a right to decide who can call my number. i pay to have it unlisted so i deserve that right to control callers. Dont do away with the no call.
